Mission

Att öka förståelsen för belysningens betydelse för en god arbetsmiljö.

Vision

Att vara det naturliga valet för dem som kräver en god ljusmiljö.

Affärsidé

Att utveckla och leverera innovativa användarvänliga och energieffektiva belysningslösningar.

Kvalitet

Våra kunders önskemål och förväntningar är vägledande i det dagliga arbetet. Vi skapar förutsättningar för nöjda kunder, ökad produktivitet, bättre miljö och varaktig lönsamhet genom långsiktiga strategier och processororientering. Alla våra produkter är CE-märkta samt funktions- och kvalitetskontrollerade.

Miljö

Vår verksamhet och våra produkter ska påverka miljön i minsta möjliga mån, både vad gäller materialval och energianvändning. Företaget är anslutet till Elretur, ett rikstäckande system för insamling och återvinning av elektriska och elektroniska produkter samt REPA, näringslivets gemensamma finansieringsbolag för insamling och återvinning av förpackningar av plast, papper/kartong, wellpapp och metall. På så sätt bidrar vi till en långsiktig hållbar utveckling och ett samhälle som fungerar enligt kretsloppsprincipen.
